

American Psychiatric Association Discovers Its Members Have a New Disorder:

GenderPatho-Philia

"an unnatural need or desire to pathologize any
gender behavior which makes you feel uncomfortable"

Did you know...

The APA uses the "disease" of Gender Identity Disorder (GID) to inflict "corrective treatment" on *non-complaining* "sissy boys" and "butchy girls" as young as 2 or 3 years old?

Did you know...

Daphne Scholinski, in locked wards from 14-18 with "GID" says "Most people die after they get out. The recovery from the system is what gets people in the end. Life expectancy of my friends is pretty low. Most of my friends are dead."

Did you know...

If an APA member wants a Breast Job or Nose Job, they're "normal," but if a transexual wants a "Groin Job," the APA slaps us with the "mental disorder" of GID.

Did you know...

GID stigmatizes use and helps fuel transgender bashings, job discrimination and hate crimes.
